

## CHEMICALS – HANDY HINTS

**SULPHATE OF AMMONIA:** Contains sulphur and nitrogen. Ideal for encouraging quick growth of leaf, brassicas, and so on.

**SULPHATE OF POTASH:** Contains sulphur and potash. Ideal for correcting any potash deficiency and for use on potatoes. It helps to increase tuber numbers. Also improves flower quality.

**SULPHATE OF IRON:** Moss killer for lawns.

**GARDEN LIME:** Increases PH from acid conditions, making them more alkaline.

**BONE MEAL:** Slow release source of phosphate.

**SPRING/SUMMER LAWN FERTILISER:** High levels of nitrogen to promote leafy growth.

**AUTUMN/WINTER LAWN FERTILISER:** Low in nitrogen, high in phosphate and potash. Encourages root growth and aids winter hardiness.

**LAWN SAND:** Moss killer with higher usage rate than Sulphate of Iron.

**GROWMORE:** Equal amounts of nitrogen, potash and phosphate. Ideal general purpose fertiliser.

**POTATO FERTILISER:** High potash, equal amounts of nitrogen and phosphate.

**ROSE FERTILISER:** High potash and phosphate, lower nitrogen.

**BLOOD FISH AND BONE:** Nitrogen and phosphate.

**JOHN INNES:** Loam based composts made to a traditional formula. The numbers relate to the higher levels of fertilisers in each mix. 1 low; 2 medium; 3 high.

**MULTIPURPOSE COMPOSTS:** General compost.

**ERICACEOUS COMPOST:** Reduced lime content. Suitable for acid loving plants.

**SEAWEED EXTRACT:** Contains growth promoting materials, which improve plant health and growth.

### **SUPER DUG ORGANIC PRODUCTS:**

**Super Dug Extra:** The UK's top selling organic fertiliser.

**Traditional Compost:** Organic formula for natural crop nutrition.

**Spring Green:** High nitrogen content for early spring growth.

**Autumn Gold:** Puts back goodness and prolongs autumn flowering.

**All Purpose Compost:** Professional quality seed and potting compost.
